## Professional Development Series 2011-2012

Last year was a great success for our Professional Development Seminar Series meetings in the Raleigh area with over 350 attendees for the 10 modules. We'll be starting up the 10 part classes, again, in case you wish to participate. Perhaps you missed some of these classes due to conflicts with your itinerary times past. Then, too, new engineers have joined our industry, and perhaps could benefit from these **PDSS** classes. A more detailed description is contained in the attached PDF.

We'd like to invite you and others on your team, to join us on the **4th Wednesday** of every month for the **PDSS** Classes GPS-100 through GPS-190 to be conducted over the next 10 months. [For Program Information Click Here.](#)

The first seminar is scheduled **Wednesday September 28, 2011**. The seminar covers Generator Sizing in detail and some of pitfalls in sizing generators correctly. Since the notice is short for GPS-100, we will conduct three sessions, **8:30AM, Noon, and 3:30PM**, each being 90 minutes with breakfast, lunch or snack included, so you can come on way to or from home or break your day with lunch.

In the following months, we will meet at noon on the fourth Wednesdays, except for the fifth Wednesday in November due to Thanksgiving Holiday and skipping December. Let us hear from you, so that we can plan these meetings to best serve **you**. We will hold PowerPacks of 3 or 4 sessions per day for our of town engineers or if you would like to make up a class.

We will hold classes here at our Raleigh headquarters conference room, **National Power Corporation, 5100 Departure Drive, Raleigh, NC 27616**, or, at a larger local venue, if certain classes attract more attendance. If you would like for us to come to your site for four or more engineers, please let me know and we will schedule a lunch and learn at your facility, saving you travel time.

Please call me with any questions at 919-861-6919. Thank you for your consideration, and we look forward to seeing you in the near future.

Regards,
