

NEW Scheduled Maintenance Kits

Now Featuring Generac Branded Motor Oil

Scheduled maintenance is important to help maintain the reliability of your customer's home standby generator. To ensure optimal performance the use of factory OEM parts is essential as these components are designed and engineered for specific generator applications. Generac has combined both of these critical offerings by introducing Generac branded motor oil in our new Scheduled Maintenance Kits.

One-stop-shopping

By placing your order on GENservice for the new Scheduled Maintenance Kits, we provide you one stop shopping and there there's only one payable. No more wasted time and trips to make additional trips / purchases of non-OEM motor oil and packaging costs to your customers.

Easy Stock Management

With only one part number for each Scheduled Maintenance Kit, it will make management of your inventory trouble-free for both the stock room and service vehicles. Free up space by having all Generac scheduled maintenance needs in one location.

Target the "Do-It-Yourself" Customer

The new Scheduled Maintenance Kits offer the complete package to the DIY customer. An easy sell during installation If your customer is a self proclaimed DIY expert, you will keep them coming back for their scheduled maintenance needs. No more wasted time and trips to make additional purchases of non-OEM motor oil – EVERYTHING is in ONE package.

Improved Scheduled Maintenance Kits are NOW available on GENservice – Order Today!
