

National Power CEO Chris Hutter Moderates Expert Panel at EV Charging Infrastructure Summit in Las Vegas

Las Vegas, March 21, 2024 – National Power is pleased to announce that CEO Chris Hutter moderated the opening panel of experts at the EV Charging Infrastructure Summit held in Las Vegas on March 21, 2024. The panel, titled "The Realities of Today's EV Charging Network to Meet Rising Deployment Demands," featured prominent leaders from the EV industry and provided an engaging and insightful start to the conference.

Mr. Hutter, known for his expertise in power and infrastructure solutions, led the panel with well-thought-out questions that encouraged deep discussions and innovative solutions. His ability to foster dialogue among the panelists created a dynamic environment for exploring the future of EV charging infrastructure.

The distinguished panelists included:

Alex Cornelia: President & CEO of Mercedes-Benz High-Power Charging North America

Jim Castelaz: Founder and CTO of Motiv Power Systems

Alex Schroeder: Chief Technology Officer and former Executive Director of the Joint Office of Energy & Transportation

The discussion centered around critical challenges and opportunities in scaling up the EV charging network to meet rising demands. Panelists explored obstacles to wider adoption of electric vehicles, particularly electric trucks and buses, and shared innovative solutions being implemented to overcome these challenges. They also discussed the future vision for America's EV charging infrastructure over the next decade, emphasizing essential steps needed to achieve a robust and resilient network.

Chris Hutter's role as moderator was instrumental in driving the conversation and ensuring a comprehensive exploration of these topics. His leadership and expertise were evident as he navigated the complexities of the discussions, bringing out the best in each panelist and facilitating meaningful exchanges.

About National Power:

National Power is a leading provider of innovative and sustainable power solutions, dedicated to ensuring the highest standards of reliability and efficiency for mission-critical operations. With a strong focus on resilience and environmental stewardship, National Power supports a wide range of industries, including broadband, wireless, industrial, water, military, EV charging, healthcare, and data centers. The company is committed to advancing technology and customer service, emphasizing energy efficiency and the integration of new technologies in a dynamic energy landscape. National Power's solutions include advanced redundant power systems, renewables, microgrids, and EV charging infrastructure, catering to clients who require uninterrupted service and seek to lead the transition to a greener, more sustainable future.
